# Blue Horizons
## Bromine Tablets

Key Features

- A popular alternative to chlorine
- Slow release 20g tablet
- Low odour – ideal for indoor pools
- Works well over a wide pH range

**Ideal bromine range:** 2 – 4mg/l (pools), 3 – 5mg/l (hot tubs)

These Blue Horizons Bromine Tablets are ideal for continuous disinfection of your pool or hot tub. Free active bromine is produced, which kills bacteria and other potentially harmful organisms.

### Application Instructions

1. These tablets are designed for use with bromine feeders and floating dispensers.
2. When feeder/dispenser requires re-filling, always follow manufacturer's instructions.
3. Ensure tablets used in the feeder/dispenser are of the same chemical (BCDMH). If other chemicals have been used previously, wash out feeder thoroughly before adding tablets.
4. Adjust the feeder to ensure a consistent bromine level is present in the pool or hot tub.
5. Check bromine levels regularly with a test kit and maintain a bromine level of 2 – 4mg/l (pools), 3 – 5mg/l (hot tubs) or 4 – 6mg/l (commercial spas).
6. Check pH level regularly with a test kit and maintain between 7.2 – 7.6.

**Note:** It is recommended that you periodically (e.g., weekly/fortnightly) shock dose your pool using Blue Horizons Pool Fusion, Rapid Shock or Non Chlorine Shock.
