Blue Horizons
Springwash

Key Features
- Fast-acting liquid cleaner
- Removes stubborn calcium scale
- Helps to promote bacteria and algae-free surfaces

Calcium scale can build up on pool surfaces and surrounding areas where 'splash out' occurs. This can become unsightly and promote bacteria and algae growth. Blue Horizons Springwash is a powerful acid-based cleaner used to promote clean and scale-free concrete and stone surfaces.

Application Instructions

Warning: This product should be handled with care. It is advised you wear goggles, gloves and mask respirator.

1. Carefully dilute Springwash in a clean plastic container at a dilution rate of 1-part Springwash to 2-4 parts water depending on the area to be cleaned.
2. Carefully apply the resulting solution to the pool surface using a soft brush. After approximately 10 minutes, wash surface thoroughly with clean water.

Note: Very heavy scale build-up may require a repeat application.
