

Gold Horizons

Spa Hardness Plus

Key Features

- Granular calcium increaser

Ideal calcium hardness range: 100 - 200mg/l

When calcium hardness (CH) levels fall below 100mg/l, water can become corrosive leading to damage to hot tub finish and equipment. Spa Hardness Plus is used to increase calcium levels.

Application Instructions

1. Pre-dissolve the product in a clean plastic container at a maximum rate of 10g of product per 1ltr of clean cold water. It is recommended that the total dose is split into three equal applications, with a minimum of 1 hour left between each.
2. After pre-dissolving, add the solution to the hot tub with the filtration on.
3. Following the application, the hot tub water may become cloudy, so keep the filtration running until it clears.
4. After product application, check the pH level is within the ideal range of 7.2 – 7.6. If not in this range, adjust.

Litres	Gallons	To raise CH by: 10mg/l	To raise CH by: 25mg/l
1,000	220	15g	38g
1,500	330	23g	56g
