AquaSPArkle
Spa Fusion

Key Features

- Convenient, pre-measured 35g sachet
- Powerful dual-action oxidiser
- Destroys bather wastes
- Added clarifier for sparkling water
- Rapid hot tub re-entry

AquaSPArkle Spa Fusion should be used weekly or after heavy hot tub use to help remove bather wastes that can build up over time. These can result in odours, reduced water clarity and unpleasant bathing conditions.

Application Instructions

Important: When dosing this product, wear eye and face protection and ensure granules are not blown back towards you.

1. With the filtration running, empty the whole sachet contents into the hot tub. Leave the hot tub cover off and the filtration running for a minimum of one hour after application.
2. One sachet (35g) will treat hot tubs up to 1,500 litres.
3. Check the sanitiser level after application. If levels have fallen within the recommended range, the hot tub may be used after one hour.

Note: As sachets cannot be re-sealed, the whole sachet **must** be used in one treatment.
